

Dermocosmetic shampoo to support the treatment of skin diseases caused by bacteria or fungi.

### VetExpert Specialist Shampoo

is a dermocosmetic shampoo for dogs and cats prone to skin disorders related with recurrent **bacterial or fungal infections**.

**Chlorhexidine** has excellent antiseptic properties and shows high effectiveness in eliminating the majority of bacterial and yeast infections of dog skin. It is not absorbed into the body and remains on the skin.

**Ketoconazole** is a broad-spectrum antifungal drug, including dermatophytes, yeasts and polymorphic fungi. It reduces pruritus and decreases the severity of skin lesions associated with skin inflammation.

Examples of clinical cases of bacterial infections.

Examples of clinical cases of fungi infections.
